Hello, visitor!

Welcome to the Academy of Life – an experiment in rethinking retirement.

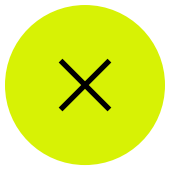

This ethnographic research is part of a global conversation in which participants imagine how they want to spend their elderly years. The collected data is anonymous, collected on an open source platform. You can see, edit or delete it by visiting a link we will send you as confirmation. You can finish this questionnaire at any point - but the further you get, the more concrete your vision of retirement will become.

Ready?

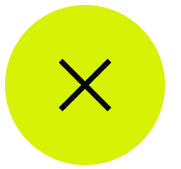

Imagine retirement as a period when you don't need to go to work any more. You don't need to be "retired", either. The division between retirement and work doesn't exist, you create the balance.

Q1

We don't seem to discuss retirement much with others.
How much do you think about your own retirement?
What do you think about?
And what do you avoid thinking about?
